3D View of System

Actual Glass and Frame will vary from rendering. Handle is optional.

SS - Wall Slide:

The Suspended Wall Slide System is an elegant and modern alternative to pocket, bi-fold, and traditional swing doors. This top-hung system is mounted at the top to a structural continuous wood header (required) and comes in a variety of colors and panel designs.

This system does not have a bottom guide that must be screwed into the flooring.

The Suspended System is always a custom system.

Important Note:
 * Continuous wood header is required, see structural requirements section.

*Specifications and details may change and be updated at any time.
