## INTERIOR GLASS DOOR SOLUTIONS

Office Fronts   Glass Partitions   Flexible Room Dividers   Conference Room Enclosures  
Sliders   Swing Doors   Barn Doors   Bi-Fold Doors   Suspended/No bottom Track   Pocket Doors

**The Sliding Door Company has been solving space planning challenges since 2005.**

The Sliding Door Company creates flexible workspaces with interior glass doors, room dividers and office partitions. **But we don't stop at commercial offices.** Our products can be found in hotels, restaurants, retail stores, apartment complexes, gyms, spas, hospitals, government centers, museums, and schools all over the world.

Choose from our sliders, swing doors, fixed glass walls, partitions, pocket doors, barn doors, bi-fold systems and even suspended doors with no bottom track. We proudly manufacture all of our state-of-the-art

interior glass door solutions with precise craftsmanship in our own factory, delivering direct to you with top-notch service.

Our patented design, specified by architects throughout North America (US Patent #7,647,729), provides both form and function with endless options to capture your desired outcome.

**OUR PROMISE TO YOU:** To build interior door solutions specifically to meet your project's requirements with sustainable quality you can rely on.

## FLEXIBLE WORKSPACES HAVE ARRIVED

With the current rise in hybrid work environments, today's offices and coworking spaces need to be as efficient and flexible as possible.

Transform your space with a wide assortment of creative configurations and varying glass opacities for privacy, all designed to create a more functional environment.

Select everything from simple office fronts to sliding glass conference room doors that can double as dry erase boards. Master key your offices to the building store front and provide ADA-compliant accessories to all occupants of the space.

Safety and quality are always built into every single panel with meticulous attention to each client's unique project requirements. We look forward to working closely with you on your next project.

## COWORKING SPACES

Coworking spaces are rapidly expanding and ever-changing. Creating an inspiring environment where people can work and thrive is our specialty.

Utilize sliding glass doors - instead of drywall - to maintain natural light, which boosts mood and productivity. Organize wide-open office floor plans into function-specific work areas. Foster creativity, teamwork and collaboration between cross-functional teams as you optimize every inch of available space.

Catering to our coworking client's specific project specs while providing unmatched quality and service is how we build relationships and earn repeat business.

## CONFERENCE ROOMS & MEETING SPACES

# INTRODUCING QUBIGLASS®

## QUBI GLASS

This innovation office solution, aptly named **QUBIGLASS®**, is just one of the reasons architects choose The Sliding Door Company over the rest. **QUBIGLASS®** is the creation of office cubicles by strategically combining our industry-leading glass products. For example, pair sliding doors with fixed panels to create a lockable L-shape or U-shape office - no drywall or construction needed. Whether you are designing a new office or renovating your current one, the possibilities are limitless. Turn that empty floor plan into organized rows of impressive custom glass workstations.

Open air QUBIGLASS® solutions allow occupants to share lighting, heating and air conditioning which saves energy costs year over year.

# MULTI-UNIT PROPERTIES

Maximize the floor plan with our sliding, stacking and stationary glass door solutions with no major construction. Add value to residential developments, condos, lofts and apartments with incredible style, functionality and the best lead time in the industry. From closet doors to room dividers, we have you covered. So does our 10-year limited warranty.

Virtually maintenance-free, our uniquely designed products are made of the most robust materials and contribute to up to 14 LEED points. ADA compliant accessories are available along with a master key option.

You can even create an extra room within an open space with no demolition or construction. That means a fast return on your investment.

**Room Dividers, Home Offices, Closet Doors and more**

# HOSPITALITY SOLUTIONS

Delivering 5-star flexibility for guest rooms, lobbies, restaurants, spas and business centers is one of our specialties. The variety of sliding, swinging, stacking or stationary glass partitions cater to a patron's evolving needs.

Developers and managers love the uplifting environment that maximizes natural light and minimizes costs.

From hotel closet doors to lobby dividers that help control foot traffic during busy times, we have you safeguarded.

Since glass and aluminum keep their shape over time, virtually maintenance-free care is all that is needed.

Talk about being inspired! Just talk to anyone who has held a meeting in one of our glass-enclosed conference rooms or business centers.

**Serving Hotels, Casinos, Restaurants, Spa Resorts, Cruises, Business Centers and Admin Offices**

# HEALTHCARE SOLUTIONS

Making the trip to the doctor's office, urgent care, hospital or clinic a little more uplifting is important to us. From lobbies to patient rooms, our turnkey solutions will boost morale throughout the process.

Visual privacy and a way to stop unwanted foot traffic is provided with our interior glass door systems. Close off a space or slide the glass wall over to achieve a larger opening whenever you want to.

Giving passionate care to patients builds rapport and creates optimism. Our space-saving interior glass door solutions contribute to a clean, sanitary environment, provide natural light and help medical professionals give the most comfortable surroundings to visitors.

**Prevent cross contamination without sacrificing natural light**

# ROOM DIVIDERS

Our room dividers are practical space-saving solutions for privacy, aesthetics and curbing foot traffic, ideal for conference rooms, gyms, retail spaces and restaurants.

You can create new spaces on demand with a nearly silent sliding glass room divider. No construction or permits needed!

Choose our flexible open-air option, or a floor-to-ceiling style, whichever meets your project requirements and vision. Both of these sensible solutions will be fabricated precisely for your space with our distinctive sleek frames and elegant finishes.

The light-to-the-touch glide and sturdy design of our flexible track system comes with options to suit your taste. Bottom tracks can be installed on top of your flooring, ramped or recessed.

# OFFICE PARTITIONS & PHONE BOOTHS

Modern glass partitions maximize the space in your office so that it makes sense for everyone. For example, when employees need a break to recharge, make a phone call, nurse, or meditate, our glass doors (Sliding doors, bi-fold doors, fixed panels, or swing doors), can create quiet and private rooms - with sound reduction and various options for opacities and locks.

# FIXED PANELS

Flexibility is always in demand for offices, restaurants, hotels, retail businesses, schools and hospitals. Our customizable glass walls can curb foot traffic, provide visual privacy, reduce noise and replace drywall for a brighter, sunnier space.

# SWING DOORS

Our durable swing doors with top hinge and bottom pivot are a unique deviation from traditional side-hinge doors. Choose from a variety of glass types, frame finishes, designer handles, and locks that can be master keyed (even to your store front!) The fixed glass panels and transom are the perfect companions for the swing doors shown here as they allow for plenty of natural light to shine through while still maintaining privacy with locked doors when needed.

# SUSPENDED SYSTEMS

Today's offices and multi-use spaces can benefit from bottomless track door solutions. With your choice of barn doors or suspended systems, the result will be seamless transitions from room to room, keeping the area open, functional and stylish.

# PASS-THROUGH WINDOWS

Enjoy the flexibility of easy opening for interaction and communication, and the ability to close and lock for added security. We provide pass-through windows for healthcare centers, waiting rooms, government buildings, school offices and reception areas.

# ENVIRONMENTALLY FRIENDLY SOLUTIONS

---

As a company that serves the entire North American marketplace and with a presence in the Philippines, we are super proud to be a part of huge efforts towards fabricating, shipping and installing solutions that preserve our environment.

Our products are made primarily of glass and aluminum which are both recyclable, reusable, demountable and movable.

Our distinguished, innovative design and production procedures maintain a clean environment from the beginning of the process in our factory all the way through installation and use in your space. Given that our products do not require any harsh chemicals for cleaning, we also help preserve indoor air quality at all times and keep maintenance to a minimum.

We give occupants a strong connection to the outdoors as light comes through the interior glass panels, which boosts mood, atmosphere and disposition. Yes, you can still achieve visual privacy by selecting more opaque glass type.

Check out the “open air” solutions that allow sharing of lighting, heating and air conditioning so that energy costs can be saved year over year. Or, if your project requires a floor to ceiling solution, we have that too.

Showcase the style & functionality you need while going the extra mile to support the environment... that’s the “wow” factor!

**Save energy costs with shared lighting, heating, and AC**

# GLASS TYPES

Choose your glass opacity:

All glass may look different depending on the project surroundings, amount of natural light, and site conditions.

# FRAME FINISHES

Choose your aluminum frame finish:

Silver

Walnut

Wenge

Black

Charcoal

White

Black Frame

Silver Frame

Charcoal Frame

# DIVIDER DESIGNS

Choose your design:

Solo

Trio

Quattro

Duo-T

Continental

Trio

Duo-T

Quattro

We can provide any finish of your choice on orders with a large quantity of panels. Ask a sales representative for details.

We can even customize divider designs to match your vision.

# CHOOSE YOUR LAYOUT

- Designate a point of entry
- Optimize floor space
- Enlarge opening clearance
- Lock if desired

The possibilities are endless...

3 sliding panels, 3 tracks. All doors can stack right, left or center for easy access to everything inside. **Layout: Track A, B, C**

4 sliding panels, 4 tracks. All doors can stack, optimizing the opening clearance. **Layout: Track A, B, C, D**

4 sliding panels, 2 tracks. Designate desired point of entry. **Layout: Track B, A, A, B.**

# KEYLESS ENTRY & SMART LOCKS

Make life easier with keyless entry! No need to change locks after a contractor leaves. Make sure all access to your space is convenient, safe and traceable with our options for keyless entrances.

With the **Steel Hawk** option on a swing door, you can easily track one time use or daily employee arrivals and departures! We provide the hardware including the swing door, the wiring inside, the paddle or handle, electrified lock and strike plate kit. You provide the number pad and ensure wiring connects with your access monitoring system.

To modernize both the swing doors and the sliders in your space, install our brand new smartphone-based access control **Keyless Smart Locks**. With these smart locks, you can unlock the lock with your fingerprint, keypad, IC card, smartphone (for remote access) or the old fashion way of using a mechanical key. Need to access the lock remotely? We can provide the Smart Lock Gateway G2 which connects to an app on your phone and allows you to have that peace of mind.

## SMART TRACKS

Interlocking smart tracks allow for a variety of configurations and can be installed on top of flooring, with ramps, or recessed.

ADA compliant smart track gives you 3 options: Regular, Ramped and Recessed.

## WHEEL-TO-TRACK

Our patented safety Wheel-To-Track locking mechanism (US Patent #7,647,729) features a unique sliding clamp device that ensures panels will not leave the tracks.

## PATENTED DESIGN

US Patent #7,647,729
